

SHREYAS Y M

MOBILE ENGINEERING LEAD

Dynamic career that reflects rich experience & year-on-year success in **Mobile Product Engineering**; targeting challenging & strategic assignments in **Fintech, Product Based or IT & Software Based Industry**; preferably in **Bengaluru or across Gulf Countries**.

✉ shreyasym4415@gmail.com

Profile Summary

- ❖ **Accomplished Mobile Engineering Lead** with **4+ years of experience** architecting and delivering scalable, enterprise-grade **Flutter applications** across FinTech, digital platforms, and startup ecosystems, with expertise spanning Android, iOS, and cross-platform mobile engineering.
- ❖ Proven expertise in **mobile architecture, mobile system design, release & deployment, platform engineering, performance & optimization, Security & Trust-Critical Mobile Systems, backend integration, event-driven systems, secure payment workflows, KYC onboarding, deep linking, and release engineering**, delivering high-performance, resilient, and user-centric applications that drive business growth and customer engagement.
- ❖ Strong capability in **designing modular, scalable, and maintainable mobile solutions** leveraging **Clean Architecture, BLoC, SOLID principles, dependency injection, and modern engineering best practices**, ensuring long-term product scalability and operational excellence.
- ❖ Experienced in leading end-to-end product delivery, collaborating with **cross-functional stakeholders** across Product, Engineering, QA, Design, Marketing, and Operations to translate business requirements into robust, production-ready solutions while driving engineering standards and delivery excellence.
- ❖ Forward-thinking technology professional with hands-on expertise in **Generative AI, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Azure OpenAI, and AI workflow orchestration**, enabling the development of intelligent, enterprise-ready AI-powered applications.
- ❖ Demonstrated success in **team & technical leadership, engineering mentorship, production reliability, CI/CD automation, cloud-native deployments, and mobile platform optimization**, consistently delivering secure, scalable, and high-quality software solutions aligned with organizational objectives.

Core Competencies

Mobile Engineering Leadership	Enterprise Mobile Platforms	Mobile Platform Strategy
Cross-Platform Application Development	Flutter & Dart Development	Scalable Application Architecture
Mobile Solution Architecture	FinTech Product Engineering	Microservices Integration

Soft Skill

- Strategic Thinking
- Communicator
- Team Leader
- Collaborator
- Multi Tasker

Education

2022

B.E. in Electrical & Electronics Engineering
Acharya Institute of Technology, Bengaluru

Career Timeline

Work Experience

Since Oct'24 | Creddinv Pvt. Ltd., Bengaluru | Mobile Engineering Lead (Flutter)

- ❖ **Mobile Engineering Leadership:** Leading the end-to-end delivery of a production-grade fintech investment platform with 15K+ downloads across Android and iOS, overseeing solution architecture, development, release management, production monitoring, and post-release support.
- ❖ **Mobile Architecture & Platform Engineering:** Architecting scalable Flutter modules using Clean Architecture, BLoC, Repository Pattern, Dependency Injection, and reusable design system components, enabling long-term product scalability, maintainability, and engineering consistency.
- ❖ **FinTech Product Development:** Delivering end-to-end investor journeys, including onboarding, profile completion, risk assessment, membership segmentation, investment readiness, authentication, session management, and backend-driven workflow orchestration.
- ❖ **KYC & Regulatory Solutions:** Designing and implementing advanced KYC V2 workflows for domestic, NRI, and foreign investors by integrating PAN verification, DigiLocker, Ddidit, WebView providers, Socket.IO events, REST fallback mechanisms, and lifecycle-aware recovery, ensuring secure and compliant user onboarding.
- ❖ **Payment & Transaction Management:** Developing resilient payment and investment processing workflows incorporating backend verification, transaction reconciliation, duplicate transaction prevention, retry mechanisms, and automated recovery for interrupted or uncertain transaction scenarios.
- ❖ **Customer Engagement & Investment Experience:** Driving the development of campaign management, investor registration, cap-table visualization, financial dashboards, disclosures, notifications, referral programs, and conversion-focused investment journeys to enhance customer engagement.
- ❖ **Deep Linking & Growth Engineering:** Designing secure deep-linking and referral attribution solutions using Android App Links, iOS Universal Links, and AppsFlyer OneLink, ensuring seamless user acquisition, referral tracking, and backend validation.
- ❖ **Application Reliability & Performance Engineering:** Integrating Firebase Analytics, Crashlytics, and Firebase Cloud Messaging (FCM) while proactively monitoring crashes, ANRs, lifecycle issues, API failures, and release regressions to maintain high application stability and production reliability.
- ❖ **Release & DevOps Management:** Managing Android and iOS application releases across Development, UAT, Pre-Production, and Production environments through Fastlane, TestFlight, App Store Connect, Google Play Console, versioning, staged rollouts, and hotfix deployments, ensuring smooth and reliable release cycles.
- ❖ **Cross-Functional Collaboration & Engineering Governance:** Collaborating with Product, Backend, QA, Design, Marketing, and Operations teams to drive architecture decisions, technical reviews, release planning, production incident management, and engineering best practices while strengthening overall delivery excellence.

Highlights:

- ❖ **Application Reach:** Supported a fintech mobile platform with **15K+** combined Android and iOS downloads, maintaining a **4.5+ Google Play rating** and supporting **2K+ monthly active users**.
- ❖ **Production Release Management:** Delivered and supported **50+** successful production releases across Android and iOS, encompassing onboarding, authentication, KYC, investments, portfolio management, campaigns, referrals, subscriptions, and payment modules.
- ❖ **Application Stability:** Achieved and sustained a **0.00% crash rate** for the latest monitored Android production release through proactive monitoring, lifecycle-aware architecture, and rigorous release validation.
- ❖ **User Growth:** Contributed to a **22% increase in Monthly Active Users (MAU)** and a **41% growth in new device acquisitions** by enhancing onboarding experiences and continuously improving product functionality.
- ❖ **Performance Optimization:** Improved application startup time and critical screen responsiveness by **20–25%** through architecture optimization, lazy loading, modular state management, and API performance enhancements.
- ❖ **Onboarding Experience:** Increased onboarding and profile completion success rates by **20–25%** by implementing backend-driven workflows, enhanced validations, session restoration, and lifecycle-aware recovery mechanisms.
- ❖ **KYC Process Enhancement:** Improved KYC completion and recovery rates by **25–30%** through DigiLocker, Ddidit, Socket.IO integration, backend reconciliation, and resume-aware recovery, while maintaining **zero mobile application-attributable KYC failures** after stabilization.
- ❖ **Payment & Subscription Reliability:** Ensured **zero mobile application-attributable payment and subscription processing failures** through backend verification, transaction reconciliation, duplicate-action prevention, and lifecycle-aware recovery.
- ❖ **Release Excellence:** Maintained a **98% successful production deployment rate** through structured QA processes, comprehensive regression testing, staged rollouts, proactive production monitoring, and rapid hotfix readiness.

Sept'22-Sept'24 | Matrical Technologies, Bengaluru | Flutter Developer - Team Lead

- ❖ **Mobile Application Development:** Developed and delivered scalable Android and iOS applications across food delivery, healthcare, salon booking, coupon management, and service-platform domains, ensuring high-quality user experiences and business scalability.
- ❖ **Product Engineering & Feature Development:** Translated early-stage product requirements into robust, maintainable Flutter solutions by delivering end-to-end features including onboarding, authentication, browsing, booking, payments, notifications, order management, coupon management, and backend-integrated workflows.
- ❖ **Application Integration & Performance Optimization:** Integrated REST APIs, Firebase services, secure local storage, third-party SDKs, and native Android/iOS capabilities, enhancing application responsiveness, performance, and overall user experience.
- ❖ **Release Management & Production Support:** Supported release planning, production deployments, application maintenance, defect resolution, QA validation, and customer issue management, ensuring stable and reliable application releases in agile startup environments.
- ❖ **Technical Leadership & Team Mentorship:** Led day-to-day Flutter development activities while mentoring 11 interns on implementation best practices, code quality, debugging techniques, and engineering delivery standards, strengthening overall team capability and development efficiency.

Technical Skills

- ❖ **Mobile & Architecture:** Flutter, Dart, Android, iOS, Native Platform Integration, Clean Architecture, BLoC, Repository Pattern, Dependency Injection, SOLID, Modular Architecture
- ❖ **FinTech Product Systems:** Investor Onboarding, Profile Completion, Risk Assessment, Membership, KYC, PAN, DigiLocker, Ddidit, Payments, Investment Workflows, Campaigns, Referrals

- ❖ **Platform & Backend:** REST APIs, Dio, Socket.IO, JWT, Webhooks, WebView Flows, Secure Storage, Android Keystore, iOS Keychain, Firebase Analytics, Crashlytics, FCM
- ❖ **Deep Linking & Release:** Android App Links, iOS Universal Links, Appsflyer OneLink, Deferred Deep Linking, Fastlane, CI/CD, App Store Connect, TestFlight, Google Play Console, Build Flavors
- ❖ **AI Engineering:** Python, LangChain, LangGraph, RAG, Azure OpenAI, Azure AI Search, Azure Blob Storage, Structured Outputs, Tool Calling, Human-in-the-loop Workflows

Personal Details

Languages Known: English, Hindi and Kannada | **Location:** Bengaluru | **Date of Birth:** 26th February 2001

ANNEXURE

PROJECTS

Production-Grade Multimodal RAG Platform | Independent Project (In Progress)

Remote

- Designing an enterprise-oriented multimodal RAG system using LangGraph, LangChain, Azure OpenAI, Azure AI Search, Azure Blob Storage, Azure Video Indexer, LangSmith, and Application Insights.
- Defining ingestion, retrieval, routing, structured outputs, tool orchestration, human approval, observability, failure handling, and production recovery patterns.

Resume and Job Description Matching Workflow | Independent Project (Completed)

Remote

- Built a Python and LangChain workflow for resume ingestion, structured extraction, semantic matching, skill-gap analysis, recommendation, and JSON-style outputs.
- Applied prompt engineering, schemas, structured outputs, retrieval concepts, validation, reusable chains, and pipeline-oriented execution.

MOBILE ARCHITECTURE WORK

1. Application Platform Architecture | Creddinv Production

- Architected a scalable cross-platform mobile application using Clean Architecture, BLoC, Repository Pattern, Dependency Injection, SOLID principles, and modular feature boundaries.
- Established reusable engineering standards, shared UI components, centralized error handling, and backend-driven workflows to improve maintainability, scalability, and engineering consistency.
- Defined application-wide architecture patterns supporting long-term feature development across Android and iOS.

2. Onboarding, Profile & User Journey Architecture | Creddinv Production

- Architected backend-driven onboarding, authentication, profile completion, and investor journey orchestration supporting Indian, NRI, and Foreign user workflows.
- Designed lifecycle-aware onboarding recovery enabling interrupted user journeys to seamlessly resume from verified backend state.
- Centralized navigation and workflow orchestration using profile completion, KYC status, and backend state as the single source of truth.

3. Authentication, Session & Application Recovery Architecture | Creddinv Production

- Designed secure authentication architecture covering login, OTP-based two-factor authentication (2FA), secure token restoration, session expiry handling, and protected application routing.
- Implemented lifecycle-aware recovery for application startup, process death, backgrounding, token refresh, network interruptions, and interrupted user journeys.
- Leveraged Android Keystore, iOS Keychain, secure storage, JWT authentication, and backend state to ensure secure session management.

4. Identity Verification & KYC Architecture | Creddinv Production

- Architected a unified KYC platform supporting Indian, NRI, and Foreign investor verification using PAN, DigiLocker, Didit, WebView providers, Socket.IO, and backend verification.
- Designed resilient KYC workflows with backend reconciliation, Socket.IO events, lifecycle recovery, bounded polling, and profile restoration.
- Separated provider failures from verified business outcomes to prevent false KYC failures during application lifecycle interruptions.

5. Payments, Subscription & Investment Platform Architecture | Creddinv Production

- Architected payment, subscription, portfolio, membership, and investment workflows covering payment execution, backend verification, transaction reconciliation, duplicate prevention, retry handling, and lifecycle-aware recovery.
- Established backend verification as the single source of truth for payment confirmation instead of relying solely on payment gateway callbacks.
- Designed reusable payment infrastructure enabling secure, reliable, and scalable fintech transaction processing.

6. Growth, Attribution & Mobile Marketing Architecture | Creddinv Production

- Architected end-to-end mobile growth infrastructure using AppsFlyer OneLink, Android App Links, iOS Universal Links, deferred deep linking, campaign attribution, and referral tracking.
- Collaborated with Product and Marketing teams to support mobile acquisition campaigns, app marketing initiatives, referral programs, conversion funnels, and user engagement strategies across Android and iOS.
- Integrated AppsFlyer, Firebase Analytics, and event instrumentation to measure attribution, campaign performance, user behaviour, and conversion insights.

7. Mobile Security & FinTech Engineering Standards | Creddinv Production

- Applied secure mobile engineering practices including OTP-based 2FA, JWT authentication, secure token storage, session expiry handling, TLS-secured communication, and authenticated API interactions.
- Implemented secure storage using Android Keystore and iOS Keychain while protecting sensitive user information across authentication, payments, and KYC workflows.
- Designed security-first architecture by validating deep links, minimizing client-side trust, protecting state transitions, and following OWASP Mobile Security best practices for fintech applications.

8. Platform Reliability, Observability & Release Engineering | Creddinv Production

- Implemented end-to-end production observability using Firebase Crashlytics, Firebase Analytics, structured logging, performance monitoring, and production diagnostics.
- Standardized release engineering across Development, UAT, Pre-Production, and Production using Fastlane, TestFlight, Google Play Console, App Store Connect, and build flavors.
- Defined comprehensive production readiness covering regression testing, API validation, lifecycle testing, onboarding, KYC, payments, subscriptions, portfolio workflows, release validation, and post-release monitoring.

9. Notification & Mobile Engagement Architecture | Creddinv Production

- Designed and implemented a scalable mobile notification and engagement architecture using **Firebase Cloud Messaging (FCM)**, backend-driven notification workflows, deep linking, and lifecycle-aware navigation across foreground, background, and terminated application states.
- Engineered reliable notification delivery by implementing token lifecycle management, transactional and campaign notification workflows, intelligent notification routing, and backend synchronization, ensuring seamless user engagement across Android and iOS platforms.
- Architected a reusable notification framework supporting product announcements, investment updates, KYC reminders, subscription events, payment status notifications, and referral campaigns, enabling scalable communication workflows, consistent user experiences, and simplified future feature enhancements.
